

### History of the PooFlingers H3

The PooFlingers was conceived of at Burlington Invihash in July of 2006 by a couple of hashers from Boston H3 and Burlington H3 sitting around a fire, enjoying a nice cold brew or two...or twelve. If you've ever sat around a fire at a hash event, you know that any idea always seems like a good idea at the time....you know, like nekked fire-jumping. But I digress. The idea was to have a kennel that would allow hares to set trail outside of their home kennel's established boundaries (ie, city limits, public transportation lines, etc) without having to necessarily go to a big event to do it. Shiggy and traveling to hash were both deemed important, as was giving a sh\*t about hashing...hence the PooFlinger moniker .

Unfortunately, the weekend ended, the hashers went home, and PooF became a thing of legend among those who were there that fine night. Once in a while someone would say "hey, we should totally do a PooF trail soon!", but alas, it didn't happen. But all was not totally lost...over the years a logo was developed, and locations for trails were considered, and finally in the spring of 2010 N\*pples Erectus and Bleeps, Sweeps, and Creeps decided it was time to make the dream a reality. On May 1st, 2010, they set the Inaugural trail at Millennium Park in West Roxbury, MA for 17 hounds/harriettes.

### PooF is:

Shiggy trails, cheap beer, and exploring areas not previously hashed. We also highly encourage traveling to hash with other kennels - if you truly give a sh\*t about hashing, then you should go see how others do it.

### Where PooF lays trail:

Generally around the New England area as that is where most of our members are based. However, the GM's reserve the right to set spur-of-the-moment official PooF trails when they travel to visit other kennels (all the more reason to follow them to events).

### **When PooF lays trail:**

Once a month on a Saturday afternoon. Check the calendar for the exact date for any given month.
